

Metaverse Trading Academy
Two decades in the markets

Private Edition 2026

CLBS V18

Institutional market reading,
taught live.

Read the market through the dealer's eye.
Not the noise.

Learn the framework. Practise it live in our trading room.

45-Day Path

Guided, step by step

Live Trading Room

Every market day

2 Books + AI

Your co-pilot, any time

Vikas Gahlot

Founder and Chief Mentor

Meet your mentor

“

The edge was never prediction. It was clarity, and the discipline to wait.

Vikas Gahlot

FOUNDER & CHIEF MENTOR

For over two decades, Vikas Gahlot has studied markets as a trader, a business leader and a student of human behaviour. Before dedicating himself to markets, he led German and Japanese enterprises, where precision, process and discipline were non-negotiable. Those same principles now shape CLBS.

He founded Metaverse Trading Academy with one mission: to help traders move beyond tips and emotion, and build real, independent skill through live market reading, practical learning and continuous mentorship.

Two decades

Reading markets

Former CEO

German & Japanese enterprises

Mentor team

Ready in every live room

The CLBS shift

Same market. A completely different you.

Most traders only ever see price. CLBS trains you to see what moves it — and that changes every decision you make.

BEFORE CLBS

- Following someone else's calls
- Entering late, after the move
- Hoping a losing trade comes back
- Chasing losses with bigger trades
- Confused about why price moved

AFTER 45 DAYS

- ✓ Mapping your own levels
- ✓ Entering with a clear plan
- ✓ Knowing where you're wrong
- ✓ Protecting capital with rules
- ✓ Seeing what moves the price

Clarity

Know what the market is doing, and why.

Confidence

Act on your own read, not someone's tip.

Independence

A skill you keep for life, in any market.

A story you may recognise

Every strong trader was once exactly **where you are.**

Before

Late nights. Three screens. A dozen indicators. A group telling you to buy now. You worked hard, harder than most, and still the market felt like a stranger.

Day 1

You walk into the live room. Nobody gives you a tip. Instead, someone asks: “What is the market doing right now, and how do you know?” For the first time, you have no answer. That’s where it begins.

Day 20

You sit beside traders who have done this for years. You watch how calm they are. How they wait. How they say “no trade” without regret. Slowly, their habits become yours.

Day 45

You open the chart before the bell. You see the levels, the positioning, the story. You know your trigger, your risk and your exit. Nobody told you. You read it yourself.

It wasn't talent. It wasn't a degree. It was rules, practice and the right people.

You become who you sit with.

What is CLBS?

A professional mind, in five clear steps.

01 Context

What kind of day is this? Balance, trend, event or transition.

02 Levels

Which prices actually matter: prior day and week, VWAP, value area, OI walls.

03 Bias

The most likely path, the alternative, and exactly what proves us wrong.

04 Strategy

Only now do we choose how to act: option buyer, hedged seller, cash, or stand down.

05 PM-CORE

The final gatekeeper. It checks evidence, conflict and risk before anything happens.

Every idea ends in one clear, professional decision:

Permission

Evidence aligned. Act on your trigger with confidence.

Restriction

Mixed evidence. Trade smaller, or wait for proof.

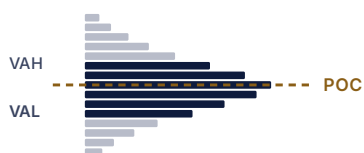

Stand-Down

Protect capital. Wait for a better setup.

Not another indicator. Not another strategy.
A way of thinking you keep for life.

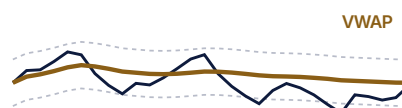

The tools you'll master

Your professional toolkit.

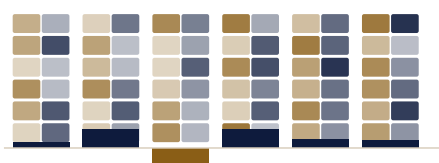

Market & Volume Profile

See where the market accepted value, and where it rejected price.

VWAP & fair value

Know if price is expensive, cheap or fair, from intraday to monthly.

Footprint & order flow

Watch real buying and selling inside every candle, level by level.

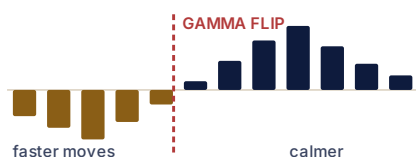

Option chain & OI

Read where positions are built, defended or abandoned.

Greeks, IV & hidden Greeks

Delta, Gamma, Theta, Vega, plus approximated hidden Greeks: Vanna, Charm, Volga, Veta.

Dealer positioning (GEX)

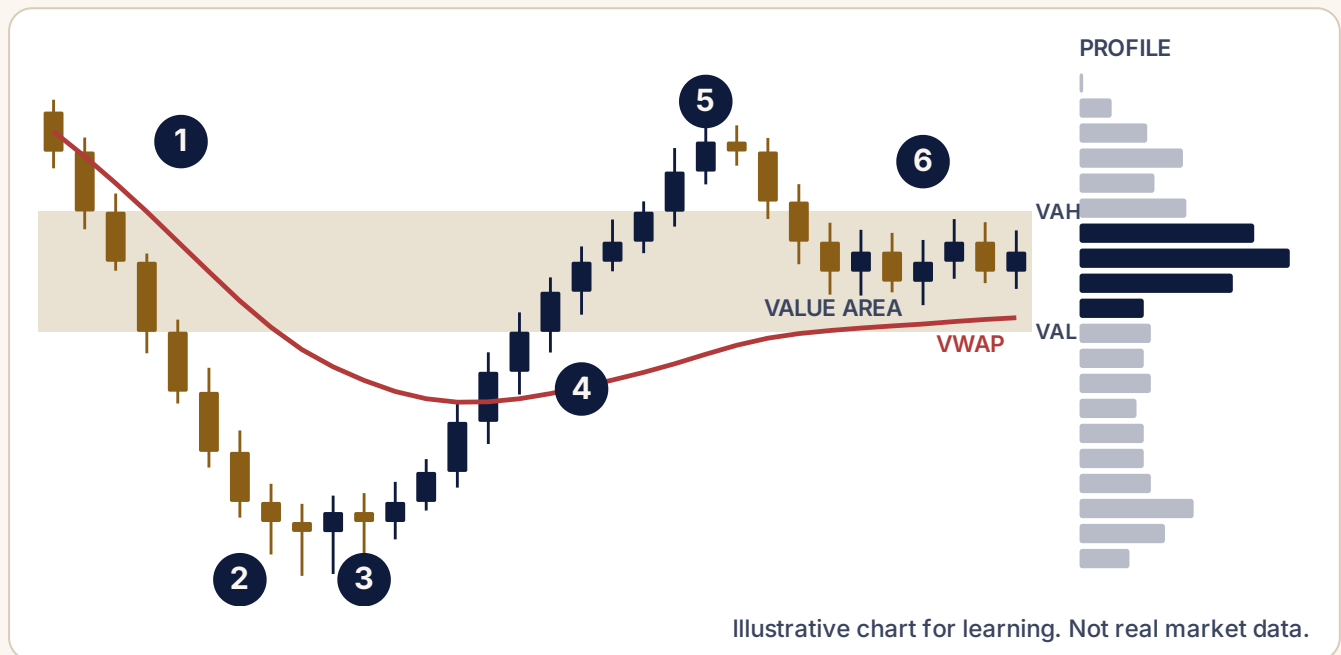

Spot when markets tend to stay calm, and when moves can speed up.

+ AI co-pilot

brings every tool together into one clear read: Context, Levels, Bias and Strategy.

See it in action

One chart. Six questions. One clear decision.

1 Context

A sharp sell-off. A real trend, or a move about to run out of fuel?

3 Absorption

Large sell orders hit a wall of buyers. Price stops falling. Evidence, not hope.

5 Rejection

A push above value fails, with no follow-through. Not every breakout is real.

2 Exhaustion

Candles shrink and selling volume dries up. The sellers are getting tired.

4 Value

Price rallies back into value, above VWAP. The auction has changed hands.

6 The plan

Rotation inside value. Clear trigger, clear risk, or stand aside and wait.

EXHAUSTION

The attacker gets tired.

Aggression fades on its own. A warning, not yet a reversal.

ABSORPTION

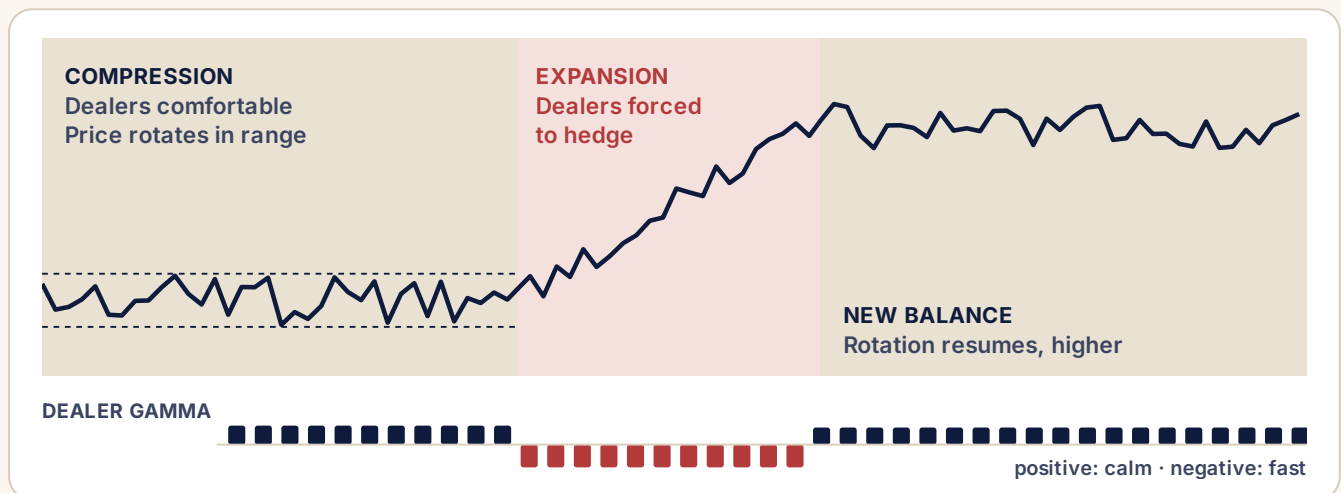

The defender stands firm.

Aggression keeps coming, but price won't move. The footprint shows who is waiting.

The dealer's eye

Read the dealer. Not the noise.

Most traders react to candles. CLBS watches the other side of the trade: where dealers are comfortable, where they're forced to hedge, and whether price will rotate or run.

A mathematical engine

OI, Greeks, GEX, gamma flip and max pain: math no human can run live. Your AI co-pilot does it in seconds.

Hedge-fund process. Your size.

The evidence-first discipline serious desks live by, sized for an individual trader.

Rotation before, rotation after

Markets rotate in ranges most of the time. CLBS shows when a range is about to break, and when it isn't.

**Don't risk another rupee
without knowing the real game.**

TRAIN FIRST · TRADE WITH EVIDENCE

All for one

One system. Every trader.

Whatever your style, the market underneath is the same: an auction, positioning, volatility and flow. CLBS reads that mechanism once, and every trader uses it their own way.

WITHOUT CLBS

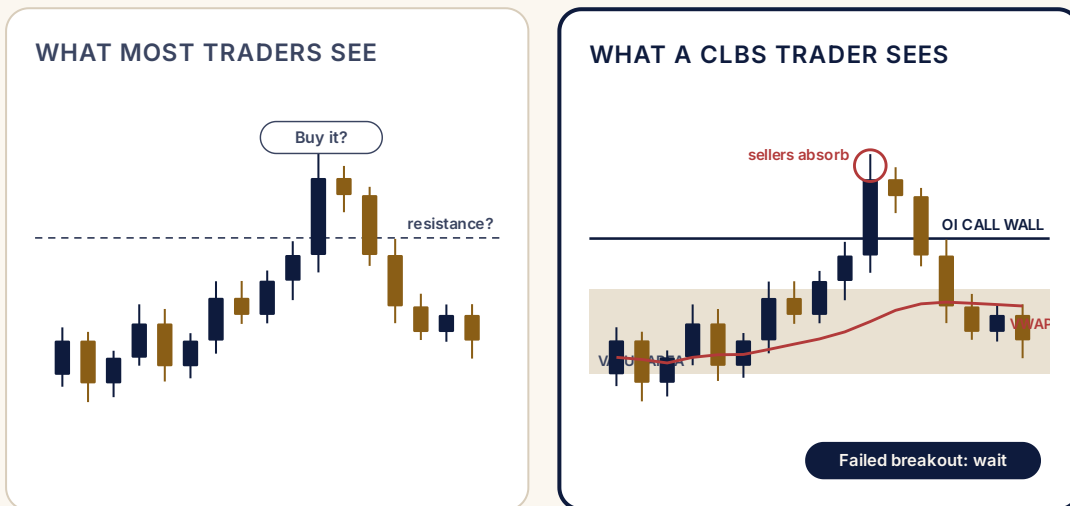

You see price.

WITH CLBS

You see why it moves.

For price action traders

Your candles. Now with the reason.

YOUR SETUPS STAY

CLBS ADDS THE PROOF

Support & resistance

→ Ranked levels: prior day and week, value area, VWAP, OI walls

Breakouts

→ Confirmed by acceptance and real flow, not one candle

Rejections and wicks

→ Proven by absorption in the footprint

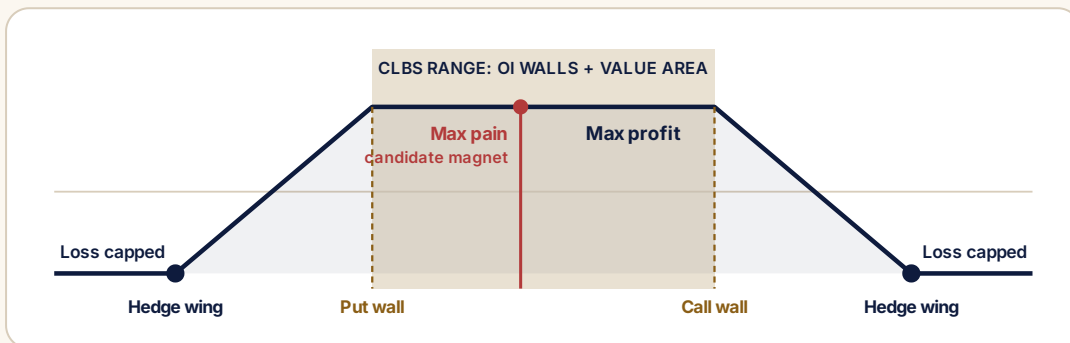

Trend

→ Checked by value migrating with price

Price action tells you what happened. CLBS
tells you why, and whether it will hold.

For option sellers · The seller's eye

Sell premium with the full map.

Compression

SELLER'S ZONE

Tight range, stable IV, dealers comfortable. Price rotates and premium decays.

Expansion

PROTECT OR STEP ASIDE

Range breaks, IV rises, dealers forced to hedge. Short premium gets hurt fast.

1 Volatility regime

Rich premium, or a storm coming? IV, VIX and skew decide.

2 Range edges

Short strikes beyond real walls: OI, value area, dealer comfort.

3 Max pain, read right

A candidate magnet while the auction stays balanced, never a promise.

4 Wings first

Spreads, condors, flies: the hedge goes on at entry. Max loss known.

Smart sellers don't hope for theta.
They read the regime and plan every rupee of risk.

From scalping to swing, and beyond

One read, every timeframe.

Any size of capital.

MODE	HOLDING TIME	CLBS READS
Ultra-scalp	 Minutes	Footprint, spread and one precise level
Scalp	 Under an hour	VWAP, opening range and order flow
Intraday	 The session	Value area, OI shifts and session phases
Swing	 Days	Weekly value, events and sector strength
Positional	 Weeks and more	Monthly structure, fundamentals and hedges

One mode per session. CLBS keeps you in it, so a scalp never quietly becomes a hope-and-hold swing.

Handling large capital

FOR HNI TRADERS

Size from risk

Position size comes from your risk limit, never from conviction.

Liquidity first

Strike, spread and depth are checked before size goes in.

Portfolio heat

Correlated positions count as one risk, not many.

Protect the book

Hedges and protective structures are planned in advance.

The trainer's code

I won't make it easy. I'll make you ready.

CLBS is not a shortcut. It's a time-taking, life-changing skill, built with the rules most traders never see, repeated until they become instinct. Hard work is the only entry requirement.

1 Show up.

Every live day counts. Consistency beats talent.

2 No rule, no trade.

If you can't name the trigger and the risk, you wait.

3 Capital first.

Protect it like it took years to earn, because it did.

4 Write it down.

Every trade and lesson, in the journal template we give you.

5 Wait for your level.

Patience is a position. The market comes to you.

6 Ask without shame.

Hide nothing from your mentor. Questions build traders.

No degree needed

If you can work hard and follow rules, you can master CLBS.

Any language

Your AI co-pilot explains every concept in the language you think in.

Quick to read

One simple sequence turns a busy chart into a clear read in minutes.

RULE NUMBER 7, AND THE ONE THAT MATTERS MOST

Practice. Practice. Practice.

Your 45-day path

From your first screen to independent decisions.

Five guided phases take you from watching the screen to leading your own market read. Each one builds on the last, with a mentor beside you all the way.

DAYS 1–5	SEE	Set up your screen, capture clean data, and describe the market before judging it.
DAYS 6–15	READ	Read VWAP, Market Profile, footprint, OI and volatility, one layer at a time.
DAYS 16–25	COMPARE	Spot conflicting evidence, track change through the day, and test strategy routes in practice.
DAYS 26–35	GOVERN	Plan triggers, invalidation, risk, exits and emotional discipline.
DAYS 36–45	OPERATE	Lead your own market read while the AI audits you and Vikas Sir corrects you.

You graduate with a skill for life.

Read any market on your own, plan every trade with a trigger and a risk limit, and know exactly when to act and when to wait. That is what professionals do, and it's what you'll do.

Live with you, every market day

Daily Live. Daily Progress.

4 Live sessions a day, 7:00 AM to 10:30 PM, every market day.
Ask any other academy to commit to this.

7:00 – 9:00 AM

● Morning preparation

Global cues, levels and scenarios. Forex and gold on radar.

9:00 AM – 3:30 PM

● Nifty live market reading

Live with mentors, checkpoint by checkpoint.

6:00 – 8:00 PM

● XAUUSD live session

Gold in the global session: dollar, value, volatility.

9:00 – 10:30 PM

● Live theory class

Concepts, case studies and open Q&A with mentors.

Saturday – Sunday

● Weekend deep dive

Weekly review, chart replay and next-week plan.

FULL-TIME TRADERS

Be in every room, all day.

- ✓ Nifty live, 9:00 AM – 3:30 PM
- ✓ Gold live, 6:00 – 8:00 PM
- ✓ Theory class, 9:00 – 10:30 PM
- ✓ Morning prep and weekend review

PART-TIME TRADERS

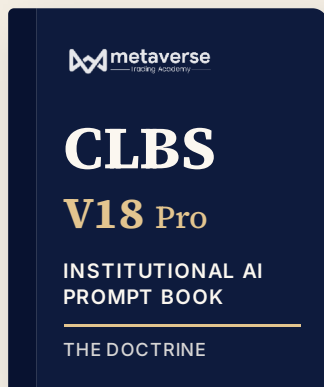

Keep your job. Learn live.

- ✓ Gold live, 6:00 – 8:00 PM
- ✓ Theory class, 9:00 – 10:30 PM
- ✓ Recordings of every key session
- ✓ Weekend review and plan

The CLBS knowledge engine

From data to decisions.

Two complementary books. One structured workflow. Independent thinking, in any market and any language.

BOOK I · 104 PAGES

Institutional AI Prompt Book

How to think.

- ✓ Evidence rules for every data point
- ✓ OI, Greeks and dealer positioning
- ✓ Auction, profile, VWAP, footprint
- ✓ Buyer, seller, stand-down routes
- ✓ Adapters for India, US, gold, crypto

BOOK II · 64 PAGES

Student Operator Manual

What to do, every day.

- ✓ AI and screen setup, clean data
- ✓ Live day: pre-open to post-close
- ✓ Scalp, swing, options and investing
- ✓ Risk sizing and emotion control
- ✓ A 10-minute drill on every page

TOGETHER, THEY BECOME YOUR AI CO-PILOT

Institutional method, away from retail noise

TYPICAL RETAIL APPROACH	CLBS INSTITUTIONAL APPROACH
Indicators and tips	Auction, positioning and order flow
Enter first, hope later	Trigger and invalidation written first
One chart, one opinion	Price, profile, footprint, OI and Greeks together
Trade every day	Stand-Down is a professional decision
Judge by P&L alone	Journal, process score and review

MARKETS COVERED

Nifty	Bank Nifty	Sensex	Stocks	Gold	Silver	Crude	Natural gas
XAUUSD	US indices	Dollar index	Forex	Crypto			

Questions, answered · Part 1

Getting started.

I don't know the basics. Can I still join?

Yes. We start from the fundamentals and build step by step. You need patience, not experience.

I already trade. Can I go straight to advanced topics?

Yes. After a short readiness check, mentors place you at the right starting point. Learn what you need, skip what you know.

How much time do I need?

Plan for focused daily practice during the 45 days. Evening classes and recordings make it possible alongside a job.

Will I feel lost in the beginning?

No. Every concept is taught simply, with real examples, and you can ask as many questions as you need, without hesitation.

Are sessions recorded?

Yes. All important sessions are recorded, with notes and templates, so you can revise anytime.

Can I talk to mentors and other students?

Yes, through live rooms, classes, Q&A and our community of serious traders.

Which AI do I need?

Any capable AI that reads PDFs, such as Claude, ChatGPT or Gemini. We set it up with you, so it becomes your personal CLBS co-pilot.

How do the two books help me?

Book I teaches you how to think. Book II shows you what to do each day. Together they turn class learning into daily practice.

Questions, answered · Part 2

Before you enrol.

Will I get tips or buy/sell calls?

We give you something better: the skill to read the market yourself, so you never have to depend on anyone's calls again.

What do you guarantee?

What we guarantee is our commitment: daily live mentorship, a complete process and support at every step. Market results depend on the market and on you, which is exactly why we build your skill.

Can I watch before I join?

Yes. Follow our free daily live market updates and see the framework work in real time first.

What are the fees?

WhatsApp or call us. We'll walk you through the programme and your best starting point.

Is the fee refundable?

Fees are non-refundable, so we make sure you're the right fit first. Ask us everything.

When do I get the books, prompts and live access?

The moment full payment is received. Both books, every prompt and all live sessions open at once.

Which trading tools do I need?

We guide you through charting, option-chain and footprint platform setup during onboarding.

How much capital do I need to start?

None to start learning. You build skill in practice first, then trade real capital when you're ready, with a clear plan and risk rules.

Before you join

Watch us live first. Then decide.

Follow our free daily live market updates. See the CLBS framework read the market in real time, with real trader evidence. Every read is timestamped and reviewed openly, before and after the move, so you can judge the process yourself.

“The course explains trading concepts in a simple and practical way... The guidance also helped me develop a more disciplined approach toward trading.”

Vishal, student

“The mentors explain concepts in a simple and practical way, making it easy to understand even for beginners.”

Manish Mehta, student
